

Aberdeen Boat Club River Circulation

Always travel upstream on the boathouse side and downstream on the City side.

All guidelines should be considered in conjunction with weather and tides as these can change the situation

Do not go beyond this bridge unless it is an emergency. It is not safe and traffic uses different rules.

When turning, make sure you don't turn into oncoming boats by going 360 degree on the wrong side of the river. Turn half way, then cross the river, then turn the rest on the correct side. Keep well upstream of the bridge.
